Oleksii Maslovskyi

MQA/AQA Engineer

Kyiv Metropolitan Area

Summary

I have 3+ years of consistent QA experience, specializing in manual testing.

In addition, I now have 6+ months of experience in automation testing.

Currently, I focus on Java-based automation for UI and API (REST) testing. I use tools like Selenium (Selenide), JUnit, RestAssured and Cucumber (BDD).

My tests can interact with databases, work with Excel data, and generate Allure reports.

I enjoy improving testing processes and delivering high-quality results.

Feel free to contact me at a.maslovsky@gmail.com.
